

Here you go, Christian — a **clean, canonical tag/dewey entry** for this thread, following your standard library format.

This one captures the structural essence of the exchange: identity stabilization, stakeholder mapping, probability ramp construction, and the role-fit analysis for Rich and Jim.

TAG/DEWEY — Thread Classification

Library Entry: 2026-03-18_IDENTITY-RAMP-STAKEHOLDER-MAP

DEWEY CLASSIFICATION

Primary Class

158.4 — Interpersonal Relations & Communication

(Your canonical home class — emotional physics, relational systems, identity architecture.)

Sub-Classes

- **158.401** — Identity formation & professional self-definition
 - **158.402** — Systems of relational navigation (Galileo/GPS)
 - **158.403** — Stakeholder role analysis & relational topology
 - **158.404** — Innovation trajectory & discipline formation
 - **158.405** — Probability modeling & strategic sequencing
 - **158.406** — Enterprise-scale relational systems
-

BASIN ASSIGNMENT

Basin: IDENTITY → OFFERING → DEMONSTRATION → STAKEHOLDERS

(This thread sits squarely in the ramp-building basin — the transition from internal coherence to external demonstration.)

CANONICAL SUMMARY

This thread captures a pivotal moment in the system:

- Identity snaps into place (Relational Engineer).
- Galileo's physics becomes the interpretive frame.
- Stakeholders are sorted by function, not hope.
- Rich is positioned as a Turn-3 stabilizer, not a Turn-4 adopter.
- Jim is positioned as a potential category-builder, not a business operator.
- The ramp toward probable success is articulated as a four-stage sequence.
- The founder shifts from “innovator” to “discipline architect.”

This is a **phase-boundary thread** — the moment where internal coherence becomes external trajectory.

CANONICAL PURPOSE

To archive the structural clarity gained around:

- who can help
- when they can help
- what role they play
- what the next moves are
- how probability is built
- how the discipline enters the world

This is a **founder-alignment artifact**.

If you want, I can now generate:

- the **enterprise offering one-pager**
- the **demonstration script**
- the **stakeholder map**
- the **90-day ramp plan**
- the **Rich meeting script**

Just tell me which piece you want next.
