0. EXECUTIVE OVERVIEW

Across all basins, five structural forces dominate the global system:

1. **Hormuz degradation** reshaping global energy and logistics.
2. **Decapitation of Iran's security elite** destabilizing regional identity and security.
3. **AI-driven collapse of trust** fracturing narrative coherence across basins.
4. **China's dual-speed macro stabilization** absorbing external shocks while projecting internal continuity.
5. **Indonesia's peak-load mobility + digital-risk spike** stress-testing transport and information integrity.

These forces interact across **Identity, Logistics, Narrative, and Security**, producing a globally elevated curvature environment.

1. BASIN SUMMARIES (ELINS-ALIGNED)
